# MORE THAN 120 YEARS OF ABT

OEM-LIKE TUNING – WE ARE PREMIUM ALL OVER

At the beginning of 2015 the road in front of the ABT HQ in Kempten was named after the late tuning pioneer Johann Abt (1935-2003). The father of today's CEO Hans-Jürgen Abt had founded ABT Tuning in 1967 and thereby launched what is now the globally largest tuner of cars produced by the Volkswagen Group, which includes the brands Audi and VW. But the Abt family has been dealing with cars, motorsports and technology much longer. Again it was a Johann Abt who laid the foundation stone. 120 years ago he founded a very innovative forge, which became associated with the four brands now symbolised by the four rings of the Audi logo shortly after WWI. And with Volkswagen ABT has had many decades of experience too. No wonder, then, that today almost all the group's models are covered. Put more generally, the Bavarian company always provides innovative solutions for quite a number of cars produced by the Volkswagen Group. All the cars and components are always state-of-the-art and embody a successful family-owned company's traditional values.

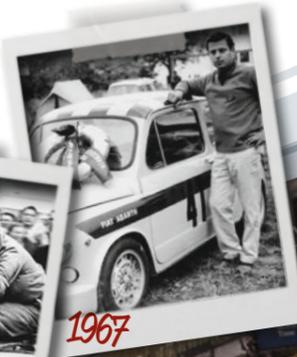

Extensive tests, its own dynamometer, comprehensive warranties and supreme QA processes make for a relationship with customers based on trust. And, of course, five decades of motorsport experience are also part of the development process. After all, over the past decade, ABT has won five DTM championships, participates as the only German team in the full-electric racing series Formula E or handles three Bentley Continental GT3's in GT Masters. ABT Sportsline stands for innovative engineering, an extravagant design and some extra dynamism and sportiness. In all developments, roadworthiness and safety top the specs. To give you an example, that is why for the development of front attachment parts ABT Sportsline uses the pedestrian impact protection test. And the market leader's premium products and services are not only available in Kempten but all over the world. Customers can always be sure that they will get tested ABT quality. That's what the name ABT has always guaranteed.

## THE ABT TT RS-R

### MAXIMUM DRIVING ENJOYMENT

The TT RS-R exists as a limited edition of 50 featuring a whole range of additional improvements. The body of the ABT TT RS-R received high quality add-on parts made of visual carbon which make it clear that this is a genuine ABT Audi. It includes the front spoiler, the exclusive front grille frame with a red TT RS-R logo, front flics and front blades, side skirt add-ons with side blades as well as a multi-part rear skirt add-on with a red TT RS-R logo to point out the concentrated power of the German sports car. The stainless steel exhaust system with double tailpipe trims ensures that the sound perfectly matches the exterior. The matching 20 inch ABT SPORT GR wheels in “glossy black” with diamond machined flange additionally underscore the added power of the coupé.

As a special model, this Quattro also deserves an appropriately exclusive sporty styling for the interior from ABT Individual. The standard seat panels as well as the side of the dashboard panel have a carbon coating. This completes the high quality, sporty appearance of the ABT TT RS-R which is more than ready to make its appearance on the road.

To ensure that the ABT TT RS-R also provides a suitable driving experience, ABT fitted it with suspension springs and sports stabilizers on front and rear axle as well – to create the perfect package for the sporty TT.

## THE ABT TT

### MORE AGILE AND SEDUCTIVE

When the new Audi TT Roadster removes its top, it will get breezy! With its successful set-up, the TT also that the most fun is found when taking bends. ABT suspension springs and stabilisers make for much balance and agility. ABT wheel spacers of 24 or 30 mm also make it very assertive. And the various ABT alloy wheels all come into their own here, e.g. the FR design in mighty 20". The CR, DR and ER-C and the very exclusive ER-F (forged) are also available, some in 18 and 19", too, and in various colours.

And for the third generation of the TT, the globally largest tuner of cars produced by the Volkswagen Group provides a body kit that makes this sports car look good from any angle, too. ABT makes its edgy face appear even more dynamic with a front skirt add on featuring a spoiler lip. Specially designed mirror caps with the ABT logo complete the front. Whoever sees the ABT TT in their rear-view mirror, will soon see its newly designed rear. Through the fixed rear wing and the skirt insert, the car is definitely made more racy, an impression also underscored by the ABT exhaust system with black-chrome-plated tailpipes and lasered ABT logos. Drivers and passengers can thus enjoy a real open-air concert whenever the pedal hits the metal.

# THE ABT TTS

## FOR PERFORMANCE-HUNGRY DRIVERS

Bends will hardly slow down the ABT TTS. Given its ABT suspension springs and sport-type sway bars... 24 or 30 mm wheel spacers make for some extra dynamism, also in visual terms. And ABT accentuates the edgy face of the TT with a front skirt add on with an offset spoiler lip. Specially designed mirror caps join the kit as well. Whoever sees the ABT TT in their rear-view mirror will soon only see its new rear, anyway. The fixed spoiler and skirt insert make the back of the car look much racier, an effect underscored by the ABT muffler system with its four black-chrome-plated tailpipes. You can also get a Y-pipe with a sport-type catalytic converter.

The car is perfectly connected with the road by the ABT FR alloy wheels or the DR, ER-C and CR wheels – in 18, 19 or 20", depending on the model.

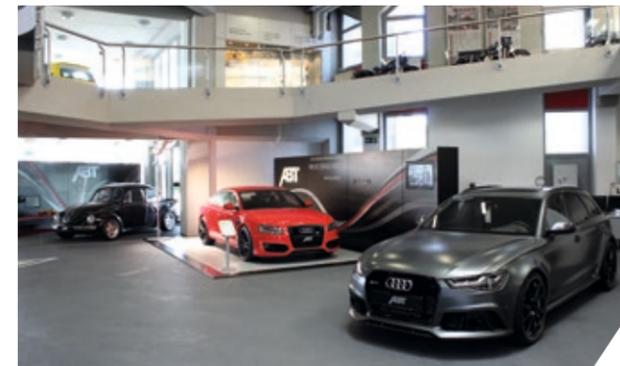

# WELCOME TO OUR HEADQUARTER IN KEMPTEN.

HOME FOR AUDI'S AND VW'S SINCE 1896.

Find out everything there is to know about "driving pleasure powered by ABT" at our head office in Kempten/Allgäu. Enjoy a fascinating review of over 70 years of racing in the ABT Motorsport Museum, experience the latest ABT cars live and up close, and discover the latest sporty accessories in the ABT Tuning Shop.
